## EXPERIENCES

### Mid PHP Developer
ShipERP — *Nov 2024–Present*

- Developed and maintained mission-critical shipping API integrations (rate calculation, tracking, booking).
- Served as the technical point of contact in client meetings, clarifying processes and resolving production issues.
- Resolved customer-reported issues by clarifying business logic, reducing rework and support overhead

### Full-time, Full-Stack Web Developer
Boom Technologies Inc. — *Jul 2022–Nov 2024*

- Led full project lifecycles for large-scale, nationwide applications and international event platforms.
- Managed staging and production servers (Ubuntu Linux) and supported deployment pipelines for the team.
- Planned and tracked project timelines using Gantt charts to ensure development tasks met or beat deadlines
- Built and integrated REST APIs consumed by Unity games and VueJS-based web platforms.
- Drove innovation by researching and integrating new APIs, enabling new project proposals for clients.
- Delivered stable releases through structured testing and documentation, minimizing production incidents.
- Mentored interns and guided their contributions to internal projects and R&D.

### Part-time, Web Developer
Boom Technologies Inc. — *Feb 2022*

- Helped develop a central e-commerce API supporting nationwide mall operations.
- Built administrative dashboard features for managing tenants, products, promotions, and daily operations.
- Wrote Postman API documentation to support integration with external development teams.

### Intern, Web Developer
Boom Technologies Inc. — *Jul 2021–Aug 2021*

- Built a smile intensity estimation system using facial recognition and face-api.js, integrated with Vue.js.
- Participated in agile sprints, integrating mentor feedback and contributing to project improvements.
- Maintained and deployed projects on remote Linux servers within an agile, collaborative team
